Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Considering independent claim 1 from which claims 2-15 depend, it should be clearly recited that the valve support disk has a portion that is cooperably secured or associated with the recessed connecting portion that allows the sliding barrel and the valve support disk to move as a single valve unit to control fluid flow through the passage of the floating barrel. Also, it should be clearly stated that the adjusting support bar allows for the float barrel to be adjusted at or to achieve different water levels. In addition, it should be clearly stated in claim 1 that the pivotal press plate control fluid flow from the upper cover, while allowing at least some of the water flow therefrom to flow into the outer chamber to add weight to the floating barrel to change its buoyancy, and relieving the weighted fluid through the passage of the floating when a rising liquid level move the sliding barrel and the valve support disk to an open fluid flow position.

If the claims are amended in the manner as recited above, they would appear to be in condition for allowance. Therefore, clarification is hereby requested.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
